

JOBSITE SAFETY CHECKLIST

Resinous flooring preparation and coating application

PROJECT / LOCATION _____ **DATE** _____

CREW LEAD _____ **START TIME** _____

1 PREP & SITE

- ☐ Review job hazards and work plan with the crew before starting.
- ☐ Isolate the work zone; keep access routes and exits clear.
- ☐ Check the silica dust control plan for grinding and shot blasting.
- ☐ Inspect shrouds, vacuums, filters and hoses before use.
- ☐ Inspect tools, guards, cords and power connections.
- ☐ Plan dust cleanup without spreading dust into occupied areas.
- ☐ Identify first aid, eyewash and emergency contacts.

2 MATERIALS & APPLICATION

- ☐ Review current SDS and labels for every product used.
- ☐ Select gloves, eye/face protection and clothing for the materials.
- ☐ Assess respiratory exposure; follow the required protection program.
- ☐ Check ventilation, vapor buildup and ignition sources.
- ☐ Plan safe mixing, spill response and waste handling.
- ☐ Check slab and air conditions against the product data sheet.
- ☐ Mark wet coating and cure areas; control access until safe.

SITE-SPECIFIC HAZARD OR CONTROL

STOP AND REASSESS IF:

Dust controls fail, conditions change, vapors build up, a spill occurs, or the crew encounters an unplanned hazard.
